

**Description:** Hemoherb 2 is a novel herbal based product, consisting of a mixture of Pharmacopoeial herbs known as chamomile, aloe Vera extract, menthe piperita, plus sunflower oil, honey, beeswax and some preservative materials. It has potent anti-inflammatory and analgesic properties. Therefore, it exerts a potential healing effect, and causes rapid improvements to the wounds and fissures of the anon-rectal region.

**Indications:** It is indicated in the following conditions:

- ❖ External and internal hemorrhoids.
- ❖ Anal pain and fissures.
- ❖ Pre-operatively and post-operatively.

**Results:** Hemoherb 2 is a unique preparation with significant effects in relieving some unpleasant symptoms that accompanied hemorrhoid such as pain, itching and skin lesion. Which are chiefly due to secondary inflammation in the anal region, and within a short period. So far no reports are available to indicate that this preparation cannot be used during pregnancy.

**Side effects:** It is generally well tolerated and has no serious side effects, with the exception of minor transient and itching reported in rare cases. Interactions: None reported so far.

**Contraindications:** It is contraindicated in microbial infection of the affected anal region. And in cases of significant bleeding from the anal region. Direction for use: Hemoherb 2 is applied three to four times daily to the affected area. Before application, the anal area should be cleansed and washed with warm water only. Patients are advised not to defecate for at least three to four hours after dose administration. It is also important to avoid constipation and diarrhea, during the treatment, in order to obtain good results.
